Dear Sir/Madam,

I am writing to introduce myself and share my background and experience. I am a final-year Computer Science and Engineering student at Green University of Bangladesh, and over the last few years I have built strong technical and professional skills through study, projects, and practical work.

I am currently completing my thesis, "GreenBot: A Chatbot-Driven Assistance Platform for Students using Customized LLM." This project has helped me learn more about artificial intelligence, chatbot development, and real problem-solving.

Along with my academic work, I am working as an SQA Intern at SQA Harbor. Here I test software, check quality, and understand how development teams work in real projects.

I have also taken part in different university clubs and leadership roles. I served as Treasurer in two organizations, worked as an Executive Member in the BASIS Student Forum, and led my team to the Hult Prize finals. These activities improved my teamwork, leadership, and communication skills.

In addition to my technical background, I work as a social media and SEO specialist for both local and international clients. This has helped me develop strong analytical and digital marketing skills.

I believe I am hardworking, responsible, and always eager to learn new things. With my combination of technical knowledge, leadership experience, and communication skills, I am confident that I can contribute well to any team or organization.

Thank you for taking the time to read my cover letter. If you need more information, I will be happy to provide it.

Sincerely,

Hasibul Hassan
